

Digital Forensic Investigation Report Template

Case Title: Ransomware Incident – HawkVision Systems Inc.

Case Number: 001-MurderCase

Investigator Name: Cuizon, Vonzelle Dajao, Joshua

Date of Investigation: July 9, 2025

I. Evidence Identification

Created By AccessData® FTK® Imager 3.1.5.0	
Case Information	
Acquired using	ADI3.1.5.0
Case Number	101042-05
Evidence Number	101042-05
Unique description	Drug Case - Kushiro Yamamoto Drug Cartel
Examiner	Vonzelle Jhoriemar Cuizon, Joshua Dajao
Notes	Case #4 Drug Case: Due to the successful buy-bust operation Kushiro Yamamoto was arrested March 15, 2021 10:45 pm in Pasil Area. Yamamoto is a big-time drug pusher, the operatives and the undercover police posing as a buyer used marked money in exchange for 12 kgs of Methamphetamine known also as Shabu on the streets. Confiscated with him is a 9mm Smith and Wesson Pistol and a thumb drive with unverifiable contents. With your expertise as a cybercrime investigator, you are tasked to perform a thorough investigation on the confiscated thumb drive using any legal methods to convict Yamamoto and lead to a bigger syndicate. The files were bagged by the first responder Insp. Godwin S. Monserate, and perform the acquisition of the image to preserve the evidence. Look for related evidence whether active or deleted files or folders analyze the contents and create a report by attaching your name together with the first responder. Remember that this report will be the key to convicting or acquitting the person.

Attention! To your Email - [redacted]@gmail.com - 09/08/2018 - was accessed by me!

 [redacted]@gmail.com
Wednesday, December 5, 2018 at 1:00 PM
[Show Details](#)

Hello!

I have very bad news for you.
09/08/2018 - On this day, I got access to your OS and gained complete control over your system. [redacted]@gmail.com
On this day your account [redacted]@gmail.com has password: [redacted]

How I made it:
In the software of the router, through which you went online, was avulnerability.
I just got into the router and got root rights and put my malicious code on it.
When you went online, my trojan was installed on the OS of your device.

After that, I made a full dump of your disk (I have all your address book, history of viewing sites, all files, phone numbers and addresses of all your contacts).

A month ago, I wanted to lock your device and ask for a not big amount of btc to unlock.
But I looked at the sites that you regularly visit, and I was shocked by what I saw!!!
I'm talk you about sites for adults.

I want to say - you are a BIG pervert. Your fantasy is shifted far away from the normal course!

And I got an idea....
I made a screenshot of the adult sites where you have fun (do you understand what it is about, huh?).
After that, I made a screenshot of your joys (using the camera of your device) and glued them together.
Turned out amazing! You are so spectacular!

As proof of my words, I made a video presentation in Power Point.
And laid out in a private cloud, look You can copy the link below and paste it into the browser:

[https://google.com/url?q=ht\[redacted\]HJUWqVz_orJFjyihJNKXSoUXNaLw](https://google.com/url?q=ht[redacted]HJUWqVz_orJFjyihJNKXSoUXNaLw)

I'm know that you would not like to show these screenshots to your friends, relatives or colleagues.
I think \$381 is a very, very small amount for my silence.
Besides, I have been spying on you for so long, having spent a lot of time!

sarah and justine -

Screenshot-2020-04-20-at-15.59.04	Apr 10, 2020	sextortion	Baird zucker zahninonan@outlook.com	I know, ***** is your password. You don't know me and you're thinking why you received this e mail, right? Well, I actually placed a malware on the porn website and guess what, you visited this web site to have fun (you know what I mean). While you were watching the video, your web browser acted as a RDP (Remote Desktop) and a keylogger which provided me access to your display screen and webcam. Right after that, my software gathered all your contacts from your Messenger, Facebook account, and email account. What exactly did I do? I made a split-screen video. First part recorded the video you were viewing (you've got a fine taste haha), and next part recorded your webcam (Yep! It's you doing nasty things!). What should you do? Well, I believe, \$1900 is a fair price for Google). BTC Address: bc1qz067cu54uplu69xkqrczytqctshm2pt4r64xe Baird

IV. Attribution and Summary of Findings

Nearly all files marked as suspicious can be traced to drugs and similar illegal activities. Images and videos including or discussing drugs, activities regarding drugs, as well as people involving drugs can be found in the image file. Additionally, a text file containing people's names and debt information can be found. Although currently marked, said text file can yet be concretely connected to the rest of files. Similarly, 2 letters involving extortion can also be found, and is only marked but not linked to the rest of the drug related files.

V. Conclusion

Analysis of the image file dictates that the original storage could have been tampered with before the image was acquired. The suspect Kushiro Yamamoto was arrested on March 15, 2021, yet the drug-related files had their dates created and modified do not match the arrest date, suggesting tampering of original file before an image was acquired.

Some files seemingly unrelated to drugs can also be found, suggesting a larger illegal operations outside of drugs.

VI. Recommendations

- Submit all relevant extracted images, metadata, and file timelines to the authorities handling the case.
- Recommend that any additional digital devices associated with the suspect (e.g., computers, smartphones, cloud storage) undergo forensic examination to search for corroborating evidence.
- Ensure that the chain of custody, as established by **Insp. Godwin S. Monserate**, remains intact throughout the investigative and judicial processes to maintain the admissibility of digital evidence.
- Perform Investigation on activities and people involved on the acquisition of image file before, during, and after

- Store all recovered materials in a secured, access-controlled forensic repository pending further legal actions.

VII. Proof of Collaboration
