

Digital Forensic Investigation Report Template

Case Title: Ransomware Incident – HawkVision Systems Inc.

Case Number: 001-MurderCase

Investigator Name: Cuizon, Vonzelle Dajao, Joshua

Date of Investigation: July 7, 2025

I. Evidence Identification

Created By AccessData® FTK® Imager 3.1.5.0	
Case Information	
Acquired using	ADI3.1.5.0
Case Number	001-MurderCase
Evidence Number	1011
Unique description	Murder Case of Robert John Rhodest
Examiner	Vonzelle Jhoriemar Cuizon, Joshua Dajao
Notes	Case #1 Murder Case: The perpetrator Robert John Rhodest was arrested with all his belongings including a flash drive that contains unverifiable files. With your expertise as a cybercrime investigator, you are tasked to perform a thorough investigation on the flash drive using any legal methods to convict the arrested murderer. The files were bagged by the first responder Insp. Godwin S. Monserate, and perform the acquisition of the image to preserve the evidence. Look for related evidence whether active or deleted files or folders analyze the contents and create a report by attaching your name together with the first responder. Remember that this report will be the key to convicting or acquitting the person.

Letter at Ocean

TO WHOM IT MAY
CONCERN: I
HAVE WAITED FOR THE
POLICE TO CAPTURE
ME FOR THE BLACK DAHLIA
KILLING, BUT HAVE NOT.
I AM TOO MUCH
OF A COWARD TO TURN
MYSELF IN, SO THIS
IS THE BEST WAY OUT
FOR ME. I COULDN'T
HELP MYSELF FOR
THAT, OR THIS.
SORRY, MARY

R8fd9ee6c7bec84e34b4fd4823202ca46

1647710

This is the Zodiac speaking.
I am the murderer of the
taxi driver over by
Washington St & Maple St last
night, to prove this here is
a blood stained piece of his
shirt. I am the same man
who did in the people in the
houth bay a-aa.
The S.F. Police could have caught
me last night if they had

IV. Attribution and Summary of Findings

Evidence 1011 showed no signs of tampering, it's hash values match with the image's hash values. First responder Insp. Godwin Monserate performed the acquisition of the image of the original flash drive.

A total of 165 files can be found, 98 were active and 67 were deleted. Most of these files can be assumed to be a student's personal flash drive, as multiple school related files like source codes, assignment images, spreadsheet, and source code can be found. A total of 6 deleted files, mostly images and photographic, showed to be related to the case. 4 can be identified as images of the victim, while 2 can be identified as confession letters. Said 6 files are displayed and labeled, together with their information, are displayed above.

All 6 files displayed unusual properties. All 6 had their last modified date precede their creation dates. These likely indicate these 6 files were copied/transferred from another source, recovered/restored from backup, or downloaded.

V. Conclusion

Based on the forensic evidence extracted from the flash drive—particularly the graphic image content, metadata timestamps, and presence of deleted files—it is highly likely that the device was used to hide or store materials related to the alleged murder. The recovered files reflect attempts to hide sensitive materials, the difference between the modified date of sensitive files with other files additionally proves this.

With the evidence verified and preserved under the direction of Insp. Godwin S. Monserate, and with subsequent forensic analysis reinforcing its relevance, it is recommended that these findings be submitted as **primary digital evidence** in support of the ongoing criminal investigation. The cumulative artifacts strongly support grounds for prosecution.

🔒 VI. Recommendations

- Submit all relevant extracted images, metadata, and file timelines to the authorities handling the case.
- Recommend that any additional digital devices associated with the suspect (e.g., computers, smartphones, cloud storage) undergo forensic examination to search for corroborating evidence.
- Ensure that the chain of custody, as established by **Insp. Godwin S. Monserate**, remains intact throughout the investigative and judicial processes to maintain the admissibility of digital evidence.
- Due to the disturbing nature of the content found, it is also advised to involve psychological profiling experts to assess the behavioral patterns indicated by the suspect's digital activity.
- Store all recovered materials in a secured, access-controlled forensic repository pending further legal actions.

VII. Proof of Collaboration
